

**Patient Consent Form**

At Midwest Eye it is our intention to provide you with the most comprehensive vision and eye health examination possible. Your insurance company does cover a standard eye examination including both an eye health evaluation and refraction (the determination of a glasses prescription). One test, that we routinely perform, is not covered by your insurance company and is described below.

**Fundus Photography**

**Fundus Photography** provides us with a permanent photographic record of the back of the eye. The camera system “finds” problems the naked eye cannot see. We feel that a photograph of your eye is the only way to accurately record the condition of your eye. The consistent use of fundus photography can provide us with a progressive account of the smallest, most gradual changes in the retina that may be related to glaucoma, diabetes, or high blood pressure.

The fee for Fundus Photography is \$45.00.

***If additional documentation and/or interpretation is required, the fee for fundus photography is \$85.00. When this occurs, these fees can be billed to your medical insurance. Please check with our front desk to determine if Midwest Eye is a provider with your plan.***

Patient Name \_\_\_\_\_

I have read and understand the above statements, I have (please check appropriate boxes)

	agreed	declined
Fundus Photography	<input type="checkbox"/>	<input type="checkbox"/>

and I understand that I will be responsible for the fees for this test if medical insurance cannot be billed.

**FYI – For Your Information**

**Contact Lenses**

Contact lenses require additional time and fees for services that are not included in the comprehensive examination fee. Annual services including corneal topography, contact lens fittings or renewal services may not be covered by your insurance provider or might only offer a discount. If you have questions regarding your coverage, we will be happy to go over fees and services, and how your insurance coverage works with these services.
